

Birth Announcements

In Owensboro Newspapers, 1874-1909

Compiled by Jerry Long

Except for the 1905-1909 issues of the "Owensboro Inquirer" each page of all Owensboro newspapers prior to 1909 were searched for any birth announcements. For the data presented here five columns were utilized: Name, Birth Date, Source Date, Parents, and Source-Location-Notes. A two letter code for the title of the newspaper is found at the beginning of the Source-Location-Notes column; the code is followed by page number of that issue, sex of child if indicated, community or place associated with birth, and any additional newspapers that an announcement was found in.

The Source codes for the various newspapers are as follows:

- ME = Owensboro Messenger & Examiner
- MI = Owensboro Messenger & Inquirer
- OI = Owensboro Inquirer
- OM = Owensboro Messenger
- OT = Owensboro Daily Tribune
- OW = Owensboro Weekly Messenger
- SE = Owensboro Semi-Weekly Messenger & Examiner
- SM = Owensboro Semi-Weekly Messenger
- TM = Owensboro Tri-Weekly Messenger

The newspapers may be in error and the birth dates should be collaborated by other sources. Just because something appears in print one should not assume that it is absolutely correct. From my experience of studying newspapers I have found that they have numerous errors, especially the older ones. Often names are misspelled. Frequently newspaper items give inconsistent data or have information that sometimes contradicts other sources such as a gravestone or a family bible. In these cases one can only make an educated decision on the basis of the preponderance of evidence. There is also the potential for error in the interpretation of the date of birth. At times an item, especially community columns, may be a delayed notice and it is difficult to be certain what date is meant. For example when it says a person died last Saturday generally it means the Saturday of the past week but occasionally it may be a Saturday a week or two ago. I used the rule that if it was a separate item or if a community column was dated and it was stated that the birth occurred on a certain weekday then the birth date could be calculated and entered. Items reported in the locals generally were published shortly after a birth and thus calculations should usually be accurate. However, if a community column was undated this rule cannot always be followed.
